10 WAYS TO
GO GREEN

REUSABLE TOTES
Opt out of single-use plastic bags and bring reusable totes to the grocery store instead.

RECYCLE!
Check if throwaway items are recyclable before tossing them in the waste bin.

LED BULBS
Swap out the light bulbs in your home with energy-efficient LED bulbs.

PLANT A GARDEN
Replace some of your yard's water-demanding lawn with native plants or a vegetable garden.

INSTALL SOLAR
Install solar panels on your home or RV to utilize the sun's clean energy.

REUSABLE BOTTLES
Use a reusable water bottle and coffee mug throughout the day to reduce waste.

REPAIR LEAKS
Repair leaks in your faucet or unsealed windows in your home to conserve resources.

GO PAPERLESS
Set up paperless billing for your accounts to help minimize paper mail.

WALK, BIKE OR CARPOOL
Walk to work, carpool to school, or take public transportation when possible.

HARNESS RENEWABLE ENERGY
Harness the full potential of renewable resources by installing a lithium battery system for energy storage.
